SECTION 1. PRODUCT AND COMPANY IDENTIFICATION

Product name : REFRIGERANT-404a

Product Use Description : Refrigerant

Manufacturer or supplier's details : ALTAIR PARTNERS, LP
343 Millburn Avenue
Suite 201
Millburn, NJ 07041 USA

For more information call : 1-973-564-6400
(Monday-Friday, 9:00am-5:00pm)

In case of emergency call : Transportation (CHEMTREC): 1-800-424-9300 or +1-703-527-3887
(24 hours/day, 7 days/week)

SECTION 2. HAZARDS IDENTIFICATION

Emergency Overview

Form : Liquefied gas
Color : colourless
Odor : weak

Classification of the substance or mixture
Classification of the substance or mixture : Gases under pressure, Liquefied gas
Simple Asphyxiant

GHS Label elements, including precautionary statements
Symbol(s) :

Signal word : Warning

Hazard statements : Contains gas under pressure; may explode if heated. May displace oxygen and cause rapid suffocation.

Precautionary statements :
- Storage: Protect from sunlight. Store in a well-ventilated place.
- Hazards not otherwise classified: May cause cardiac arrhythmia. May cause frostbite. May cause eye and skin irritation.

Carcinogenicity

No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP, IARC, or OSHA.

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical nature : Mixture

</tbody>
</table>

SECTION 4. FIRST AID MEASURES
Inhalation : Move to fresh air. If breathing is irregular or stopped, administer artificial respiration. Use oxygen as required, provided a qualified operator is present. Call a physician. Do not give drugs from adrenaline-ephedrine group.

Skin contact : After contact with skin, wash immediately with plenty of water. If there is evidence of frostbite, bathe (do not rub) with lukewarm (not hot) water. If water is not available, cover with a clean, soft cloth or similar covering. If symptoms persist, call a physician.

Eye contact : Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. In case of frostbite water should be lukewarm, not hot. If symptoms persist, call a physician.

Ingestion : Unlikely route of exposure. As this product is a gas, refer to the inhalation section. Do not induce vomiting without medical advice. Call a physician immediately.

Notes to physician

Treatment : Because of the possible disturbances of cardiac rhythm, catecholamine drugs, such as epinephrine, should be used with special caution and only in situations of emergency life support. Treatment of overexposure should be directed at the control of symptoms and the clinical conditions. Treat frostbitten areas as needed.

SECTION 5. FIREFIGHTING MEASURES

Suitable extinguishing media : The product is not flammable. ASHRAE 34
Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.
Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Specific hazards during firefighting : Contents under pressure. This product is not flammable at ambient temperatures and atmospheric pressure. However, this material can ignite when mixed with air under pressure and exposed to strong ignition sources. Container may rupture on heating.
Cool closed containers exposed to fire with water spray. 
Do not allow run-off from fire fighting to enter drains or water courses. 
Vapours are heavier than air and can cause suffocation by reducing oxygen available for breathing. 
In case of fire hazardous decomposition products may be produced such as: 
Hydrogen fluoride 
Carbon monoxide 
Carbon dioxide (CO2) 
Carbonyl halides

Special protective equipment for firefighters : In the event of fire and/or explosion do not breathe fumes. Wear self-contained breathing apparatus and protective suit. No unprotected exposed skin areas.

Further information : Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions : Immediately evacuate personnel to safe areas. Keep people away from and upwind of spill/leak. Wear personal protective equipment. Unprotected persons must be kept away. Remove all sources of ignition. Avoid skin contact with leaking liquid (danger of frostbite). Ventilate the area. 
After release, disperses into the air. Vapours are heavier than air and can cause suffocation by reducing oxygen available for breathing. Avoid accumulation of vapours in low areas. Unprotected personnel should not return until air has been tested and determined safe. Ensure that the oxygen content is >= 19.5%.

Environmental precautions : Prevent further leakage or spillage if safe to do so. The product evaporates readily.

Methods for cleaning up : Ventilate the area.
## SECTION 7. HANDLING AND STORAGE

**Handling**

Handle with care.  
Avoid inhalation of vapour or mist.  
Do not get in eyes, on skin, or on clothing.  
Wear personal protective equipment.  
Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50 °C.  
Follow all standard safety precautions for handling and use of compressed gas cylinders.  
Use authorized cylinders only.  
Protect cylinders from physical damage.  
Do not puncture or drop cylinders, expose them to open flame or excessive heat.  
Do not pierce or burn, even after use. Do not spray on a naked flame or any incandescent material.  
Do not remove screw cap until immediately ready for use.  
Always replace cap after use.

**Advice on protection against fire and explosion**

The product is not flammable.  
Can form a combustible mixture with air at pressures above atmospheric pressure.

**Storage**

**Requirements for storage areas and containers**

Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50 °C. Do not pierce or burn, even after use.  
Keep containers tightly closed in a dry, cool and well-ventilated place.  
Storage rooms must be properly ventilated.  
Ensure adequate ventilation, especially in confined areas.  
Protect cylinders from physical damage.

## SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**Protective measures**

Do not breathe vapour.  
Do not get in eyes, on skin, or on clothing.  
Ensure that eyewash stations and safety showers are close to...
the workstation location.

**Engineering measures**
- General room ventilation is adequate for storage and handling. Perform filling operations only at stations with exhaust ventilation facilities.

**Eye protection**
- Wear as appropriate:
  - Safety glasses with side-shields
  - If splashes are likely to occur, wear:
    - Goggles or face shield, giving complete protection to eyes

**Hand protection**
- Leather gloves
- In case of contact through splashing:
  - Protective gloves
  - Neoprene gloves
  - Polyvinyl alcohol or nitrile-butyl-rubber gloves

**Skin and body protection**
- Avoid skin contact with leaking liquid (danger of frostbite). Wear cold insulating gloves/face shield/eye protection.

**Respiratory protection**
- In case of insufficient ventilation, wear suitable respiratory equipment.
  - Wear a positive-pressure supplied-air respirator.
  - Vapours are heavier than air and can cause suffocation by reducing oxygen available for breathing.
  - For rescue and maintenance work in storage tanks use self-contained breathing apparatus.

**Hygiene measures**
- Handle in accordance with good industrial hygiene and safety practice.
  - Ensure adequate ventilation, especially in confined areas.
  - Do not get in eyes, on skin, or on clothing.
  - Remove and wash contaminated clothing before re-use.
  - Keep working clothes separately.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state : Liquefied gas
Color          : colourless
Odor           : weak
pH             : Note: neutral
Melting point/freezing point: Note: no data available

Boiling point/boiling range: -47.8 °C

Flash point: Note: not applicable

Evaporation rate: > 1
   Method: Compared to CCl4.

Lower explosion limit: Note: None

Upper explosion limit: Note: None

Vapor pressure: 12,610 hPa
   at 21.1 °C (70.0 °F)
   25,572 hPa
   at 54.4 °C (129.9 °F)

Vapor density: 3.43 Note: (Air = 1.0)

Density: 1.08 g/cm3 at 21.1 °C

Water solubility: Note: Very slightly soluble in cold water, hot water.

Partition coefficient: n-octanol/water: log Pow: 1.06
   Test substance: 1,1,1,2-tetrafluoroethane (HFC-134a)

Ignition temperature: < 750 °C

Decomposition temperature: > 250 °C
Global warming potential (GWP) : 3,784
Ozone depletion potential (ODP) : 0

SECTION 10. STABILITY AND REACTIVITY

Chemical stability : Stable under normal conditions.
Possibility of hazardous reactions : Hazardous polymerisation does not occur.
Conditions to avoid : Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50 °C. Decomposes under high temperature. Some risk may be expected of corrosive and toxic decomposition products. Can form a combustible mixture with air at pressures above atmospheric pressure. Do not mix with oxygen or air above atmospheric pressure.

Incompatible materials to avoid : Potassium Calcium Powdered metals Finely divided aluminium Magnesium Zinc

Hazardous decomposition products : In case of fire hazardous decomposition products may be produced such as: Gaseous hydrogen fluoride (HF). Carbonyl halides Carbon monoxide Carbon dioxide (CO2)

SECTION 11. TOXICOLOGICAL INFORMATION

Acute inhalation toxicity 1,1,1-Trifluoroethane : LC50: > 540000 ppm Exposure time: 4 h Species: rat

### Subchronic Toxicity

**1,1,1,2-Tetrafluoroethane**
- Species: rat
- NOEL: 50,000 ppm

### Genotoxicity in vitro

**1,1,1-Trifluoroethane**
- Test Method: Ames test
- Result: negative

**Pentafluoroethane**
- Test Method: Ames test
- Result: negative

**1,1,1,2-Tetrafluoroethane**
- Note: In vitro tests did not show mutagenic effects
  - Cell type: Human lymphocytes
    - Result: negative
  - Cell type: Human lymphocytes
    - Result: negative
  - Cell type: Chinese Hamster Ovary Cells
    - Result: negative

### Genotoxicity in vivo

**1,1,1-Trifluoroethane**
- Species: mouse
- Cell type: Bone marrow
- Application Route: Inhalation
- Result: negative

### Teratogenicity

**1,1,1-Trifluoroethane**
- Species: rat
  - Application Route: Inhalation exposure
  - NOAEL, Teratog: 40,000 ppm
  - NOAEL, Maternal: 40,000 ppm
  - Note: Did not show teratogenic effects in animal experiments.

**Species: rabbit**
- Application Route: Inhalation exposure
- NOAEL, Teratog: 40,000 ppm
NOAEL, Maternal: 40,000 ppm
Note: Did not show teratogenic effects in animal experiments.

Pentafluoroethane:
Species: rabbit
Application Route: Inhalation exposure
NOAEL, Teratog: 50,000 ppm
NOAEL, Maternal: 50,000 ppm
Note: Did not show teratogenic effects in animal experiments.

Species: rat
Application Route: Inhalation exposure
NOAEL, Teratog: 50,000 ppm
NOAEL, Maternal: 50,000 ppm
Note: Did not show teratogenic effects in animal experiments.

Further information:
Note: Acute Health Hazard Ethane, pentafluoro- (HFC-125):
Cardiac sensitisation threshold (dog): 75000 ppm.
1,1,1-trifluoroethane (HFC-143a): Cardiac sensitisation threshold (dog): >250000 ppm.
1,1,1,2-tetrafluoroethane (HFC-134a): Cardiac sensitisation threshold (dog): 80000 ppm.
Vapours are heavier than air and can cause suffocation by reducing oxygen available for breathing. Irritating to eyes and skin. Rapid evaporation of the liquid may cause frostbite. Avoid skin contact with leaking liquid (danger of frostbite). May cause cardiac arrhythmia. Chronic Health Hazard 1,1,1-trifluoroethane (HFC-143a): Not mutagenic in AMES Test.

SECTION 12. ECOLOGICAL INFORMATION

Biodegradability
Pentafluoroethane:
Result: Not readily biodegradable.
Value: 5 %
Method: OECD 301 D

Further information on ecology
Additional ecological information:
This product is subject to U.S. Environmental Protection Agency Clean Air Act Regulations at 40 CFR Part 82.
This product contains greenhouse gases which may contribute to global warming. Do NOT vent to the atmosphere.
To comply with provisions of the U.S. Clean Air Act, any
residual must be recovered.

SECTION 13. DISPOSAL CONSIDERATIONS

Disposal methods : Observe all Federal, State, and Local Environmental regulations.

Note : This product is subject to U.S. Environmental Protection Agency Clean Air Act Regulations Section 608 in 40 CFR Part 82 regarding refrigerant recycling.
